## Integrated Energy Solutions Certificate Program

Advance your skills and your career in energy efficient building design with a Certificate in Integrated Energy Solutions from California State University, East Bay.

The demand for skilled engineering solutions managers, technical solutions engineers, project engineers and other technical professionals who aspire to be at the top of their game in designing and implementing energy efficient systems for commercial, industrial and agricultural environments for the energy and utilities industry is at an all time high.

Designed for professionals who already work in integrated demand side energy management or are expanding their career to this field, this program can help you gain the knowledge and expertise you need to gain new skills and stay ahead of the curve in a rapidly evolving field.

The IES curriculum was developed in collaboration with PG&E®.
